since its publication twenty years ago the first edition of this work has been the closest thing to a standard book on plato s political theory like the first edition this edition of the development of plato s political theory provides a clear scholarly account of plato s political theoryin the context of the social and political events of his time and draws connections between the development of his political theory and other aspects of his philosophy especially his moral psychology special attention is paid to the political nature of plato s political theory to how hislifelong concern with questions of moral and political reform evolved along with other aspects of his theory and to both socrates and his own efforts to reform actual cities this second edition has been thoroughly revised to take into account scholarly developments during the last twenty years major changes from the first edition include reworking central aspects of chapters on the statesman and laws and detailed discussion of questions of interpretation how plato s dialogues should be read among other subjects receiving increased attention are plato s alleged totalitarianism andracism and the place of the nocturnal council in the political theory of the laws

studies of plato s metaphysics have tended to emphasise either the radical change between the early theory of forms and the late doctrines of the timaeus and the sophist or to insist on a unity of approach that is unchanged throughout plato s career the author lays out an alternative approach focussing on two metaphysical doctrines of central importance to plato s thought the theory of forms and the doctrine of being and becoming he suggests a continuous progress can be traced through plato s works he presents his argument through an examination of the metaphysical sections of six of the dialogues the euthyphro phaedo republic parmenides timaeus and sophist

plato is a much more experimental philosopher this book argues than most commentators acknowledge supporting this position henry

teloh combines exegesis of particular passages with a synoptic view of plato's philosophical development through his early middle and late dialogues the result is a study of plato's ideas with a more ambitious scope than any since w d ross's in 1951 the book chronicles plato's changing interests through a focus on his ontological commitments that is on the types of entities he addresses it also traces many of the assumptions in plato's thought back to their sources in pre socratic philosophy by depicting the changes in plato's thought from one period of dialogue composition to another and by seeking to explain these changes from textual evidence this book offers an appealing introduction to plato for all humanists

this book is an anthology of plato's writings connected with sections of commentary

a classic in the field this third edition will continue to be the book of choice for advanced undergraduate and graduate level courses in theories of human development in departments of psychology and human development this volume has been substantially revised with an eye toward supporting applied developmental science and the developmental systems perspectives since the publication of the second edition developmental systems theories have taken center stage in contemporary developmental science and have provided compelling alternatives to reductionist theoretical accounts having either a nature or nurture emphasis as a consequence a developmental systems orientation frames the presentation in this edition this new edition has been expanded substantially in comparison to the second edition special features include a separate chapter focuses on the historical roots of concepts and theories of human development on philosophical models of development and on developmental contextualism two new chapters surrounding the discussion of developmental contextualism one on developmental systems theories wherein several exemplars of such models are discussed and a corresponding chapter wherein key instances of such theories life span life course bioecological and action theoretical ones are presented a new chapter on cognition and development is included contrasting systems approaches to cognitive development with neo nativist perspectives a more differentiated treatment of nature oriented theories of development is provided there are separate chapters on behavior genetics the controversy surrounding the study of the heritability of intelligence work on the instinctual theory of konrad lorenz and a new chapter on sociobiology a new chapter concentrates on applied developmental science

this comprehensive and exhaustive reference work on the subject of education from the primary grades through higher education combines educational theory with practice making it a unique contribution to the educational reference market issues related to human development and learning are examined by individuals whose specializations are in diverse areas including education psychology sociology philosophy law and medicine the book focuses on important themes in education and human development authors consider each entry from the perspective of its social and political conditions as well as historical underpinnings the book also explores the people whose contributions have played a seminal role in the shaping of educational ideas institutions and organizations and includes entries on these institutions and organizations this work integrates numerous theoretical frameworks with field based applications from many areas in educational research

a quarter of a century after its initial publication the classroom arsenal remains pivotal in understanding and challenging the relentless promotion of technology to reform education this seemingly benign education technology juggernaut carries forward the momentum of military agendas in man machine systems detailed in the book promoters continue to flood schools with technology and its still unfulfilled promise of cutting edge personalized learning meanwhile they continue as well their insatiable pursuit of federal funding educational legitimacy corporate profits and access to student subjects and their accumulated learning data for product development less understood though is a companion enterprise there from the start to replace teaching and learning in traditional classrooms by efficient automated systems that manage and monitor human cognition and learning for high performance systems from weapons systems to high tech corporations as education is moved imperceptibly away from its traditional humanistic aims and from the classroom itself the goal of this human engineering project the depersonalized accumulation of cognitive components for a 21st century militarized economy best befits the book's original title the human arsenal this ongoing military corporate sponsored enterprise continues to impact education today largely unnoticed one example is the federally funded advanced distributed learning initiative adl which has been a major force behind the implementation of electronic learning systems now used in all defense department and federal employee training with the defense advanced research project agency arpa adl is developing structures to capture students soft skills and the army research laboratory is developing intelligent tutoring systems to enable instructional management of affect engagement and grit

perseverance adl through the department of defense has developed experience api a learning technology that can monitor all student online and offline interactions and archive these in date lockers or learning record stores adl has already impacted thousands of school districts through nonprofits such as ims global and future ready schools part of an industry massively subsidized by high tech corporations and valued at 255 billion annually a 90 million advanced research projects agency for education arpa ed modeled after the military s arpa has been proposed to fund dramatic breakthroughs in learning and teaching these include digital tutors as effective as personal tutors and with the navy s full spectrum learning project data collection tools for personalized education modeled after corporate data analysis that identifies consumer patterns and preferences adl is just one example of how the military corporate ed tech enterprise is changing public education by hollowing it out into something that can be digitized data driven automated and monitored its promoters envision education as children interacting with online learning systems where based on past performance algorithms will serve up what each student needs to know next through this digital curriculum students create virtual educational identities at very young ages and learning devices are watching students as much as students are watching them such is the education landscape presaged by the classroom arsenal a quarter century ago whose origins and trajectories need to be deeply understood now more than ever
